Identification
Web of Science Core Collection (SCIE)
Search span: Jan 1, 2000 to Oct 31, 2026
Query: (alveolar echinococcosis OR E. multilocularis) AND (liver OR hepatic) AND (surgery OR ELRA)
Initial records retrieved: n = 456 (Article / Review)
Metadata Quality Inspection
Full record & cited references verified
Unique WoS accession numbers (UT): 456
Duplicate records removed: n = 0
HTML tags stripped (<italic>, <bold>)
Screening
Publication Integrity & Retraction Screening
Records screened for retraction notices and bibliographic validity (n = 456)
Non-retracted standardized dataset retained for sensitivity comparison (n = 453)
Excluded: Retracted Publications (n = 3)
1. WOS:000246982200023 (2007, Liver Transpl)
2. WOS:000401125000020 (2017, J Surg Res)
3. WOS:000507597800009 (2019, Sci Rep)
All 3 retracted articles removed prior to analysis
Eligibility
Clinical Eligibility Assessment (n = 453)
Title, Abstract & Author Keywords evaluated:
• Confirmed E. multilocularis / HAE diagnosis
• Confirmed hepatic, biliary, or IVC involvement
• Confirmed surgical, transplant, or interventional focus
• Landmark ELRA & hepatic surgery reviews retained
Excluded Off-Topic Records (n = 91)
• Pure Cystic Echinococcosis (E. granulosus), E. vogeli, or non-echinococcal trauma matched only via WoS Keywords Plus (n = 46)
• Veterinary cases (dogs, sheep, primates) or mouse/in-vitro preclinical studies (n = 31)
• Exclusively extrahepatic primary lesions (n = 14)
Included
Final Core HAE Surgical Dataset (n = 362)
• Original research articles: n = 304 (84.0%)
• Clinical reviews & guidelines: n = 58 (16.0%)
• Total citations: 10,361 (Mean CPP = 28.62)
• Dataset H-index: 43 | Co-cited refs: 6,842
• Time span: Jan 1, 2000 – Oct 31, 2026
4D Thesaurus & Entity Standardization
• Author disambiguation: merged inverted & hyphenated names (Wen H, Aji T, Vuitton DA)
• Institution unification: merged affiliated hospitals with parent universities
• Keyword harmonization: unified ELRA, hepatectomy, radical resection & PNM terms
